

Environmental policy

Well aware of ecological issues and more locally of the environmental impact of our activity, Deltafluid has decided to implement specific policies in order to:

- Prevent or at least minimize the environmental nuisances that we may cause daily or accidentally,
- Ensure compliance with legal and regulatory environmental requirements,
- Continuously improve our practices while keeping under control the waste we generate,
- Avoid energy and natural resources waste.

This guidance leads us to develop a management system based on the ISO 14001 standard, which will enable to manage the environmental dimensions of our activity and to assess our environmental performance.

In that way, I am personally and on behalf of Deltafluid committed to enhancing our practices, and I am requesting from Deltafluid employees to ensure compliance with this policy, which applies:

- To all of our professional activities
- On any site where we operate (fabrication workshop, offices, subcontractors facilities).

The QSESN Manager is designated as independent with organisational authority to manage environmental issues, with unrestricted access to DELTAFLUID top management,

Yannick Lubet, Deltafluid General manager, 18/08/2023

This block contains a smaller version of the Deltafluid logo on the left, and a handwritten signature 'Y. Lubet' in black ink on the right. The signature is written in a cursive style.
