

Environmental Policy– DELTAFLUID

Recognizing the environmental challenges associated with its operations, DELTAFLUID is committed to managing its environmental impact and continuously improving its environmental performance.

Our environmental policy is based on the following commitments:

1. Management's Commitment

Management is committed to:

- Integrating environmental considerations into the company's operations,
- Providing the necessary resources,
- Promoting an environmental culture at all levels.

2. Compliance and Impact Management

DELTAFLUID is committed to:

- Complying with applicable legal and regulatory requirements,
- Identifying and managing the environmental aspects of its operations,
- Preventing pollution, including accidental pollution.

3. Resource and Waste Management

We are committed to:

- Reducing waste generation and promoting waste recovery,
- Optimizing the use of natural and energy resources,
- Minimizing waste.

4. Implication des collaborateurs et des partenaires

We are committed to:

- Raising employee awareness of environmental best practices,
- Encouraging their daily involvement,
- Identifying third parties that have implemented environmental initiatives

5. Continuous improvement

DELTAFLUID is committed to:

- Continuously improving its environmental management system,
- Monitoring and evaluating its performance,
- Implementing appropriate measures.

6. Commitment to ISO 14001 certification

DELTAFLUID is committed to developing and strengthening its environmental management system in order to obtain ISO 14001 certification within three years.

Management is committed to ensuring that this policy is communicated, understood, and implemented.

The QSE-SN Manager has the necessary authority and independence to oversee environmental matters, with direct access to Management.
